

FORGING AHEAD

IU INDIANAPOLIS

IU Indianapolis has emerged as a premier research university and a driving force in the state and local economy—innovating across industries, serving as the city’s leading Research 1 institution, and preparing Indiana’s future workforce to lead with purpose and integrity.

We’re invested in the future of Indiana’s workforce

89% graduates stay in Indiana after graduation

90% graduates were employed full or part time, entered volunteer service or the military, or continued their education within six months of graduation

39% undergraduate students took at least one course with an internship, practicum, research, or other hands-on learning component

Partner with us to equip more students with real-world experience and build a thriving future for Indiana’s workforce.

INDIANAPOLIS

Expanding Indiana's economy through strategic workforce development

IU Indianapolis is preparing students to close critical skills gaps in healthcare and STEM, while contributing to a tech-powered future that supports innovation, business, and entrepreneurship throughout the state. Through a broad and strong network of partnerships with leading corporations—such as Salesforce, Eli Lilly, and Amazon—nonprofits, government agencies, and educational institutions statewide, we're equipping students to make an immediate impact where Indiana needs them most.

Indianapolis' premier R1 university

Our research excellence is reflected in real outcomes—from discovering the cure for testicular cancer to **graduating roughly 80% of the state's dentists**. We are strengthening healthcare across the state and ensuring that breakthroughs in medicine reach the people who need them most.

Our R1 status isn't just a classification, it's proof that we're driving progress in higher education and delivering tangible benefits to Indiana communities. This work attracts world-class professors and students and creates opportunities for exploration, collaboration, and growth at the intersection of education and industry.
